

ATTENTION:

Women ♦ Age 55 to 80

Vince and Associates Clinical Research is looking for healthy women between the ages of 55 and 80 who may have Osteopenia to participate in a research study with an investigational medication.

Osteopenia is the early sign of bone loss that can lead to osteoporosis.

You may be at risk of having Osteopenia if you have a thin or small frame, get too little calcium in your diet or have a family history of osteoporosis.

Qualified participants will receive study medication and study related care at no cost. Additionally, compensation up to \$1,950 may be available for time and travel.
