FOR IMMEDIATE RELEASE

VINCE & ASSOCIATES CLINICAL RESEARCH OPENS DEDICATED NEUROPSYCHIATRIC RESEARCH CENTER

Overland Park, KS July 7th, 2011– Vince & Associates Clinical Research, a leading provider of early development clinical trials to the global biopharmaceutical industry announces the opening of their new, dedicated Neuropsychiatric Research Center in Overland Park, KS. This research facility supports the needs of the pharmaceutical and biotechnology sectors by providing effective study recruitment, medical management and oversight in study volunteers across a range of neuropsychiatric disorders including both acute and chronic schizophrenia.

“While Vince and Associates has been conducting clinical trials in schizophrenia over the past decade, this dedicated unit will allow us to better serve the needs of both study volunteers and our biopharmaceutical clients,” said Dr. Brad Vince, President and Medical Director.

Debra Kelsh, MD, a Board-Certified Psychiatrist and an Investigator in over 300 clinical trials, will serve as Medical Director of the new Neuropsychiatric Research Center. “The safety and security of our study volunteers was highly emphasized during the design of the unit,” said Dr. Kelsh.

Successful subject recruitment at Vince & Associates is driven by the extensive and proprietary database in excess of 40,000 verified patients and healthy normal volunteers. By conducting an in-depth medical history, Vince and Associates helps ensure an accurate estimate of study volunteers available for clinical trials. Full-time recruitment staff, a community outreach team and an in-house call center establishes a strong foundation in subject recruitment and routinely positions Vince and Associates as a top enrolling research facility.

About Vince & Associates Clinical Research

Vince & Associates Clinical Research has been providing clinical research services to the biopharmaceutical industry for more than a decade. The research professionals at Vince & Associates are proud to be recognized in the industry as a “Center of Research Excellence.” Vince & Associates has become a premier clinical research site by utilizing The Physician Research ModelSM of operation where study teams are led by highly experienced Principal Investigators intricately involved in all aspects of the clinical trial process.

Vince & Associates also recently opened a new state-of-the-art, multi-million dollar, 90 bed Clinical Pharmacology Unit which combines the ultimate in subject safety and luxury. This boutique hotel-like facility features 10 unique and luxuriously designed research suites. Bedside 20 inch touch-screen entertainment systems allow study volunteers individual access to watch TV and movies, surf the net or play video games. This new unit has the upscale amenities necessary for the recruitment and retention of study volunteers in both short and long term clinical trials. From the safety and security of the controlled access unit to the added features of a movie theatre and game rooms, no detail has been overlooked.
