Dr. Brad Vince, with Vince and Associates Clinical Research, Presents at the Exploratory World Development Congress 2009

Overland Park, KS – Vince and Associates Clinical Research (VACR), a leading provider of Phase I-IV clinical trial research, announced that Dr. Bradley Vince, Medical Director and President, shared his expertise at the Exploratory Development World Congress on October 20, 2009 in Boston, Massachusetts. The Exploratory Development World Americas Congress focuses on early development strategy, including a wide range of disciplines within clinical trials including Clinical Research, Clinical Pharmacology, Phase I Trials, Exploratory Development, Regulatory Affairs, PK/PD and Clinical Operations.

The pre-conference workshop facilitated by Lorraine M. Rusch, Ph.D, Vice-President of Business Development at VACR, was entitled *Mitigating Risk in Early Clinical Development*. During the session, Dr. Vince discussed *Recruiting Strategies and Medical Oversight of Special Population Volunteers in Early Stage Trials*. Dr. Vince related his physician perspective on the recruitment and medical management of intent-to-treat populations during early clinical research trials which enable earlier Proof of Concept (POC) drug development data to be successfully obtained.

“As a multi-specialty research unit, Vince and Associates Clinical Research is a leading provider of Phase I-IV clinical research for the pharmaceutical and biotechnology industry,” said Dr. Vince. “We welcomed the opportunity to share our perspective, medical expertise and strength in early-stage drug development data at the Exploratory World Development Conference.”

As the Medical Director of the Vince and Associates Clinical Research, Dr. Vince provides overall management of Phase I-IV clinical pharmacology services, including study design, feasibility, recruiting and monitoring of both healthy normal subjects and special population patients participating in clinical trials at the Overland Park, Kansas facilities.

About Vince and Associates Clinical Research

Vince and Associates Clinical Research is a dedicated research facility that conducts Phase I-IV clinical trials for the global pharmaceutical and biotech industry. Dr. Vince has personally assembled an experienced team that focuses on quality research data and exceptional customer service while maintaining the highest ethical and professional standards. Vince and Associates has become one of the premier U.S. clinical research sites specializing in multiple therapeutic trials. With over 275 clinical trials completed and having worked with over 70 sponsors and CROs, Vince and Associates is well known and respected for its rapid study start-up and quality study data.
