FOR IMMEDIATE RELEASE

Vince and Associates Clinical Research Adds USP 797 Certified Clean Room to Pharmacy Capabilities for Early Development Trials

Overland Park, KS, February 6, 2012– Vince and Associates Clinical Research, the premier provider of innovative early clinical research services to the global biopharmaceutical industry, announces the certification of their pharmacy cleanroom in compliance with United States Pharmacopeia (USP) <797> guidelines. This certification enables Vince and Associates Clinical Research to prepare intravenous and other preparations to the highest clinical research standards.

“This uniquely designed pharmacy includes an ISO 8 rated ante-room attached to an ISO 7 individual clean room containing a Class A2 Biological Safety Cabinet used for sterile compounding to support the ever evolving needs of our clients and safety for our research subjects,” said Scott Smiley, RPh, Director of Pharmacy Operations at Vince and Associates Clinical Research. “This new certified clean room adds depth to our existing pharmacy capabilities including a negative pressure extemporaneous drug preparation room and 24 hour video surveillance monitoring.”

Vince and Associates specializes in conducting complex, early development studies such as First-in-Human (FIH) clinical trials which often require sterile compounding. The USP <797> clean room allows for the preparation and compounding of a wide range of investigational compounds. “The certification of the USP <797> clean room highlights our expertise in providing our clients with the pharmacy capabilities needed to quickly generate data to support earlier decisions in drug development, “ said Dr. Brad Vince, President and Medical Director of Vince and Associates Clinical Research. “Our pharmacy and clean room are an integral component in our state of the art clinical pharmacology research unit, and allows Vince and Associates to execute highly customized early development studies in both healthy normal and special population volunteers across a wide array of therapeutic areas.

About Vince & Associates Clinical Research

Vince & Associates Clinical Research has been providing clinical research services to the biopharmaceutical industry for more than a decade. The research professionals at Vince & Associates are proud to be recognized in the industry as a “Center of Research Excellence.” Vince & Associates has become a premier clinical research site by utilizing The Physician Research ModelSM of operation where study teams are led by highly experienced Principal Investigators intricately involved in all aspects of the clinical trial process.

Vince & Associates also recently opened a new state-of-the-art, multi-million dollar, 90 bed Clinical Pharmacology Unit which combines the ultimate in subject safety and luxury. This boutique hotel-like facility features 10 unique and luxuriously designed research suites. Bedside 20 inch touch-screen entertainment systems allow study volunteers individual access to watch TV and movies, surf the net or play video games. This new unit has the upscale amenities necessary for the recruitment and retention of study volunteers in both short and long term clinical trials. From the safety and security of the controlled access unit to the added features of a movie theatre and game rooms, no detail has been overlooked.
