Dr. Brad Vince, of Vince and Associates Clinical Research, Nominated for Clinical Trial Innovation as part of the 2nd Annual Partnerships in Clinical Trials Awards

Overland Park, KS – Vince and Associates Clinical Research, a leading provider of Phase I-III clinical trial research, announced that Dr. Bradley Vince, Medical Director and President, has been named as a nominee for the Clinical Trial Innovation Award at the 2nd Annual Partnerships in Clinical Trials Awards in Orlando, Florida. This award honors a person who has embraced trial innovation, applied innovative tools or techniques for clinical trial strategy, and/or implemented novel partnering strategies to improve trials and fast forward projects from candidate drug to marketed product.

The primary reason behind the nomination is the expansion of Vince & Associates early development capabilities with the opening of their state-of-the-art, 90 bed Clinical Pharmacology Unit in 2011. Upscale amenities like bed side touch screen entertainment units, a movie theater, game room and internet café have vaulted Vince & Associates into the spotlight as they are able to get the special populations needed for complex clinical trials. The industry has taken notice.

“It’s an honor to be recognized for the work we’ve been doing here” said Dr. Vince. “We have done our best in creating an environment and system that assists us in recruiting and retaining special population volunteers that are imperative in determining the effectiveness of a compound in its target population early on. These studies require a volunteer to be in-house anywhere from 14 – 30 days. Volunteer comfort and retention are vital in getting the required data to determine the benefits of a drug candidate.”

Voting for this prestigious award will be done by industry peers onsite at the 21st Annual Partnerships in Clinical Trials held at the Marriott World Center in Orlando, Florida, March 4-7, 2012.

About Vince and Associates Clinical Research

Vince & Associates Clinical Research has been providing clinical research services to the biopharmaceutical industry for more than a decade. The research professionals at Vince & Associates are proud to be recognized in the industry as a “Center of Research Excellence”. Vince & Associates has become a premier clinical research site by utilizing The Physician Research ModelSM of operation where study teams are led by highly experienced Principal Investigators intricately involved in all aspects of the clinical trial process.

Vince & Associates also recently opened a new state-of-the-art, multi-million dollar, 90 bed Clinical Pharmacology Unit which combines the ultimate in subject safety and luxury. The boutique hotel level amenities feature 10 uniquely designed research suites. Bedside 20-inch touch-screen entertainment systems that allow study volunteers individual access to watch TV and movies, surf the internet or play a host of games. This new unit has the upscale atmosphere necessary for the recruitment and retention of study volunteers in both short and long-term clinical trials. From safety and security of the controlled access unit to the added features of a movie theater and game rooms, no detail has been overlooked.
